

Tasks

Task	Completed?
1. Wash dog	<input checked="" type="checkbox"/>
2. Buy groceries	<input type="checkbox"/>
3. Cook dinner	<input type="checkbox"/>

Ajax

Checks if a task is completed.

If a task is checked completed, it will hide the row from the "to-complete" table.

If the task is unable to update when checked, it is given a different div class.

Success or failure will be passed to the controller to determine how to process the task.

Tasks

Task	Completed?
1. Buy groceries	<input type="checkbox"/>
2. Cook dinner	<input type="checkbox"/>
